

MAKES THINGS EASY

What's New!

**DON'T TAKE OUR WORD FOR IT—
HEAR WHAT ENROUTE 4 USERS ARE SAYING...**

"So many new and interesting features you just want to say WOW at every new thing!"

—René Giroux, Enseignes Perfection Signs

The amount of new and improved features make this release one that you just can't ignore, from the innovative texturing tool, through complete text, new CAD tools, Quick Fit Nesting, measure tool dimensioning and the list just goes on. Every new and improved feature makes you more productive.

EASE OF USE = PRODUCTIVITY

"I can tell you that the new EnRoute 4.0 is as easy to use as Microsoft Paint."

—Daniel Antes, Distinctive Hardwood Floors

With the new bottom panel that replaces the floating precision input box dialog, the interface is more streamlined and out of the way. We have reordered the menus to make it more concise too.

TEXTURES & 3D SCULPTING

"The texture generation tool looks to be a tool that has unlimited potential... Combined with the ability to add bitmaps under or over there truly is no limit to what can be easily and quickly accomplished."

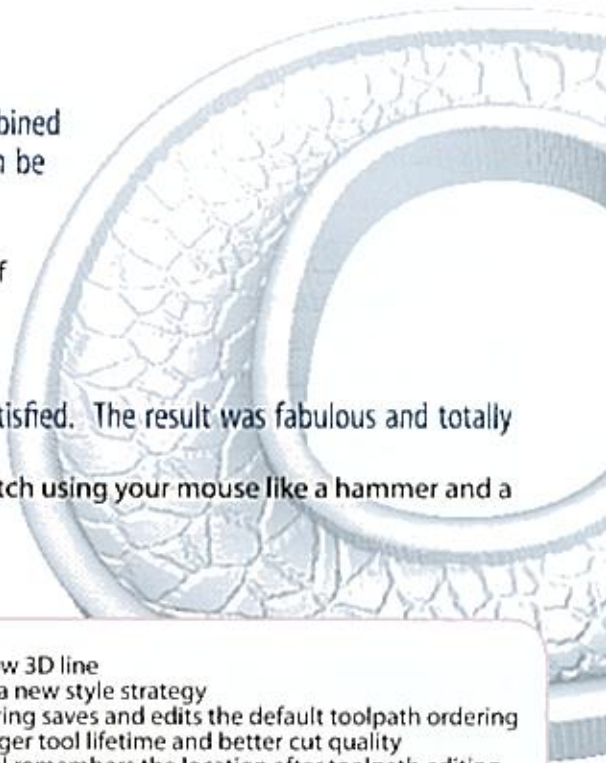

—Dan Sawatzky, Sawatzky's Imagination Corporation

The new texturing tool makes it easy to design unlimited texturing in a click of a button—see this for yourself!

"I set my freehand texture tool to carve into the wood. I easily achieved exactly the effect I designed by simply hacking away at the virtual block until I was satisfied. The result was fabulous and totally random."

—Dan Sawatzky, Sawatzky's Imagination Corporation

The new Touchup Tools will let you quickly edit a relief or create one from scratch using your mouse like a hammer and a chisel. There are no limits to your imagination!

New Toolpaths:

- Engrave toolpath to follow 3D line
- Spiral toolpath provides a new style strategy
- Improved Toolpath ordering saves and edits the default toolpath ordering
- Bridges type ensures longer tool lifetime and better cut quality
- Improved Entry / Exit tool remembers the location after toolpath editing

What's New!

"In just a few words, I absolutely love it. I was surprised to see so many good changes all packed in a new release. EnRoute users will be thrilled by all the changes and new users will be amazed to own the best 3D software package out there."

—René Giroux, Enseignes Perfection Signs

Create

DESIGN

"Quality, Multiple features, Ease of output, and excellent technical support. What more can I ask for?"

— Dave Wilson, Dipco

A complete text object is introduced in the new EnRoute 4; with text on arc, text on curve, kerning, letter height, width and so on—reducing the need to use other design applications.

"I used to draw in AutoCAD and import to EnRoute 3.0. Now I find I am doing all of my work in EnRoute 4." — Daniel Antes, Distinctive Hardwood Floors

Do it all right inside EnRoute 4. New drawing, editing, shape measure & dimension tools make producing all your creations simpler and friendlier than ever before.

"With EnRoute, concept to finished product even in complicated 3-D designs is a snap!" — Dave Wilson, Dipco

Improved Path Editing Tools are even more powerful and an ideal match for the best vectorization engine in the industry. Using the improved fillet, trim & extend and offset tool, design possibilities are limitless.

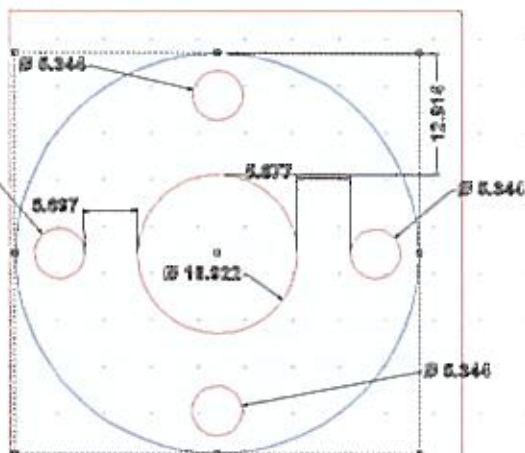

SPEED & EFFICIENCY

"The new lightning fast render is AWESOME making the creation of files much easier. These new tools unleash a torrent of new methods and techniques in file creation which allow me to achieve the wild visions in my head."

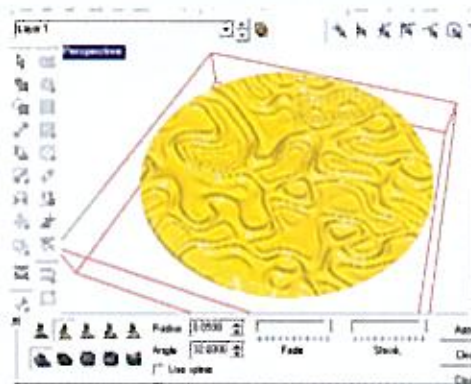

— Dan Sawatzky, Sawatzky's Imagination Corporation

Quick Fit Nesting – nesting was never so easy, just drag the object and it will automatically fit itself where it can, as if the object can think for itself!

Fast rendering keeps you moving. Once Rendered, you can see the changes as they happen to your rendered file.

AMAZING
QuickFit nesting!!!
